Reviewer's report

**Title:** Determinants of male partner participation in skilled antenatal care in peri-urban Gulu district, Northern Uganda

**Version:** 1  **Date:** 14 March 2010

**Reviewer:** Anna-Karin Elisabeth Dykes

**Reviewer's report:**

Discretionary Revisions

1. The reference nr.26 seems incomplete.

The manuscript is interesting and well written. It focuses on an important issue during pregnancy and childbirth. Hopefully the result will inspire health care providers to support male partners to take part in the birth of their child.

I will recommend this manuscript for publication.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.
