Reviewer's report

Title: High maternal mortality estimated by the sisterhood method: a rural area of Mali

Version: 3 Date: 27 June 2011

Reviewer: Ibrahima TEGUETE

Reviewer's report:

Anyway I reassure that all my major concerns have been cleared when I read the new manuscript and the answer letter. So this paper is Ok for publication and I am sure it constitutes a landmark study for the Malian rural area. Surely national authorities will use take it into account.
