Reviewer’s report

Title: Utilisation of malaria preventive measures during pregnancy and birth outcomes in Ibadan, Nigeria

Version: 3 Date: 17 April 2011

Reviewer: Oladoyin Odubanjo

Reviewer’s report:

1. General Comments
The authors have adequately addressed issues raised in the first review. However there is need for the article to be proofread thoroughly.

2. Minor Essential Revisions
Materials and methods
• Study design (Line 5) – The UCH is a tertiary …
• Sample size (Line 1) – “eenrolling” to be enrolling
• Data management (Line 5) – Remove “between”
• Ethical approval – OYSHMB approval needed

Results
• Pregnancy outcomes (Line 2) – should be “only the use of IPTsp…”

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
