Reviewer’s report

Title: Exercise in pregnant women and birth weight: a randomized controlled trial

Version: 2 Date: 14 September 2011

Reviewer: Michelle Mottola

Reviewer’s report:

Thank you for addressing my comments and suggestions. I do have a few more suggestions for revision.

Minor Essential Revisions:
1) Pg. 3, line 7, Wolfe and Davies actually recommended, 3 to 4 or 5 times per week. Please change to reflect this.
2) Pg. 8, line 4, Delete “for” after “apart from”
3) Pg. 14, 3rd paragraph, line 6. Awkward sentence. I would change to, “Nevertheless, the results of the present study confirm previous data which showed that moderate intensity aerobic exercise does not negatively affect birth outcomes or gestational age”.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
