Reviewer’s report

Title: Individual and health facility factors and the risk for obstructed labour and its adverse outcomes in south-western Uganda

Version: 2 Date: 31 August 2011

Reviewer: Matthews Mathai

Reviewer’s report:

The revisions are satisfactory.

Two minor essential revisions:

1. Under Methods para 2, "boarders" to be corrected to "borders"
2. Under Outcome variables: Were neonatal outcomes classified as "live births" or stillbirths"? Since perinatal mortality was an outcome of interest, how were early neonatal deaths classified?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
