Reviewer's report

Title: A population-based surveillance study on severe acute maternal morbidity (near-miss) and adverse perinatal outcomes in Campinas, Brazil: The Vigimoma Project.

Version: 2 Date: 18 November 2010

Reviewer: Edward Fottrell

Reviewer's report:

Minor issues not for publication:

The language in general needs a final polish - although this is not an impediment to understanding the report.

The proportions living in Campinas reported on Page 9, 3rd paragraph (58.4%) differs slightly from the proportion reported in Table 2 (58.8%).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
