Reviewer's report

Title: Induced abortion, pregnancy loss and intimate partner violence in Tanzania: a population based study

Version: 2 Date: 30 January 2012

Reviewer: Sia Msuya

Reviewer's report:

General:
The authors have answered the raised comments well and the paper is easy to read and follow.

Minor comments

Background:
• Page 5, 1st paragraph there is typographical error in writing the reference (7, 8 {Lipsky, 2003 # 1142)
• The paragraph describing pathways on how IPV can lead to adverse reproductive health outcomes. The last paragraph on page 5, “The second indirect pathway is based on the assumption that the intimate partner violence reduces women’s prenatal risk and health seeking behavior…”

Did the authors meant IPV increase women’s prenatal risk and reduce health seeking behavior??
