Reviewer's report

**Title:** Low level maternal smoking and infant birthweight reduction: genetic contributions of GSTT1 and GSTM1 polymorphisms

**Version:** 2  **Date:** 16 November 2012

**Reviewer:** Xinguang Chen

**Reviewer's report:**

The authors are very responsive to the previous review and the manuscript has been substantially improved. I have identified only one part that need some revision: In Lower part in Table 2, reverse the order of “GSTT1 Present vs null” and “GSTM1 Present vs null” # null vs. presents so that the beta coefficients become negative, consistent with the rest of the result. To make this revision, the authors have to re-run the analysis.

**Level of interest:** An article of outstanding merit and interest in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.

**Declaration of competing interests:**

I have not any competing interest.
