Title: Maternal Carotid Remodeling and Increased Carotid Arterial Stiffness in Normal Late Gestational Pregnancy as Assessed by Radio-Frequency Ultrasound Technique

Version: 2 Date: 7 March 2013

Reviewer: Andrzej Wykretowicz

Reviewer's report:

Thank you for letting me review again 'Maternal Carotid Remodeling and Increased Carotid Arterial Stiffness in Normal Late Gestational Pregnancy as Assessed by Radio-Frequency Ultrasound Technique". The text and content is now improved and I have some minor remarks.

In Abstract—Conclusion the abbreviations QAS and QIMT are used without prior explanation.

I have still concerns regarding the standard of English expression in the paper. Authors might wish to use one of the commercial editing services available such as Inter-Biotec http://www.inter-biotec.com/.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
