Reviewer's report

Title: Trends of Antenatal Care and Health Facility Delivery Attendance Following Community Mobilization and Health Facility Strengthening Interventions in Kitgum District, Northern Uganda

Version: 3 Date: 5 November 2012

Reviewer: munira sultana

Reviewer's report:

Major compulsory revisions:
ANC was provided by the health workers. It is not clear whether the health workers provided ANC at the facility level or through house to house visit. The data on ANC attendance was collected from health facilities' compiled report. Please confirm whether the ANC attendance report was kept by the health workers' record or facility record. Was it verified with the client? When was this recorded? What happens if clients show up for ANC and do not show up for delivery?

Minor Essential Revisions:
Please explain the components of ANC. Was it a basic ANC or comprehensive ANC?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
