Title: The influence of socio-cultural interpretations of pregnancy threats on health-seeking behavior among pregnant women in urban Accra, Ghana

Version: 1 Date: 28 June 2013

Reviewer: PAMELA MARTEY

Reviewer's report:

Minor Essential Revisions:

1. Page 14 paragraph 2: The first sentence is not clear. Can it be re-structured to make the point clear?

2. Page 27. Last paragraph under recommendation and conclusion: The first sentence is incomplete. The word 'women' is missing at the end of the sentence.

Discretionary Revision:

3. Page 23. The second paragraph (the first recommendation) under recommendation and conclusion: 'Development of comprehensive maternity care model that encourages continued use of facility base care starting from pregnancy, through delivery and care.'

I think it will be of great advantage if this care is extended to cover the pre-pregnancy period where possible.

Level of interest: An article of importance in its field

Quality of written English: Acceptable
