Reviewer's report

Title: Management of hepatitis B in pregnant women and infants: a multicentre audit from four London hospitals

Version: 2 Date: 10 October 2013

Reviewer: Liliam Cristine Rolo Paiato

Reviewer's report:

Minor essential revisions

Good manuscript, but some corrections are necessary.

ABSTRACT:

The conclusion should be improved. The information about the necessity of improve intersectorial sharing of information objecting to reduce the risk of women of high infectivity should be cited.

TEXT:

BACKGROUND (In the second paragraph, line 6): Hepatitis B immunoglobulin should be mentioned before the abbreviation HBIG (present only in the second line of the third paragraph).

BACKGROUND (In the third paragraph, line 9): Is better to mention hepatitis B surface antigen before than HbsAg (present only in the methods, in the lines 4 and 5 in the first paragraph).

METHODS: good structure.

RESULTS (In the fourth paragraph, line 4): the Figure 2 is not clear. The information in this graphic, is it about each hospital or about global evaluation? Improve this information in the text and in the figure.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
