Reviewer's report

Title: An integrative review of the side effects related to the use of magnesium sulfate for preeclampsia and eclampsia management

Version: 3 Date: 6 January 2013

Reviewer: OFFER EREZ

Reviewer's report:

The authors did not address my main concerns regarding the study design and selections of low to middle socio-economic countries.
I do not think the study can be accepted without addressing this issue in a comment if the discussion.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
