Reviewer’s report

Title: Misoprostol for postpartum hemorrhage prevention at home birth: An integrative review of global implementation experience to date

Version: 2 Date: 14 January 2013

Reviewer: Andrew Weeks

Reviewer’s report:

Thanks for your changes - it is much easier to read now.

Minor essential
1. In the last paragraph of page 6 i would like to see the exact figures for the 3 increases in facility rates.
2. In the 5th column of table 1, I am still unclear what postpartum sample is - and if it is the size of the sample that were interviewed after delivery, why is it not the same figure as for column 7? A footnote would help here.
3. I would be happy to see table 6 be removed - it refers to such small numbers that the data is uninterpretable.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
