Major Compulsory Revisions
The introduction and method section is now revised.
results. The result section is described on a detail level. I miss next step where
the authors lift the result to a more abstract level.
In discussion the authors use the three themes accessible, engaged and
responsible as a basis. However The logical link between result and these three
themes is missing.

In summary, The result and discussion sections needs to be developed in order
to reach scientific stringency.

Level of interest: An article of importance in its field
