Reviewer's report

Title: Prevalence and determinants of unintended pregnancy among women in Nairobi, Kenya

Version: 3 Date: 25 February 2013

Reviewer: Sherri Bucher

Reviewer's report:

The authors have done a good job of responding to the comments raised in the initial review cycles. The manuscript is much improved and makes a contribution to the literature, particularly for those policy makers and investigators interested in reducing maternal mortality by reducing unintended pregnancy, and by investigators interested in the potential impact of cultural mores and traditions upon uptake of family planning and/or messaging related to acceptability of family planning.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
