Reviewer's report

Title: Prenatal diagnosis of fetal cardiac malposition caused by unilateral lung agenesis

Version: 2 Date: 4 December 2012

Reviewer: Ornella Milanesi

Reviewer's report:

Major compulsory revision:
pag 6 §2 line 1 and followings. The concept expressed in this paragraph is incorrect. It is necessary to establish the position of the head of the fetus to define which is the left and which is the right side of the fetus. The authors must give more details on the diagnostic technique they are proposing, explaining what is new in comparison with what everyone does while diagnosing a fetal cardiac or pulmonary malformation.

Minor essential revision
pag. 4 § 1 Background, line 3: "ecumenical" I don't understand the meaning of this word in this context.

pag 5 § 1 Study population, line 2: "during May 2006 and March 2012". suggested change "in the time frame between May 2006 and March 2012"

pag 5 § 3 Assessment of fetal cardiac position, line 2, : "Austria). They were equipped" suggested change "Austria), equipped"

pag 5 pag 5 § 3 Assessment of fetal cardiac position, line 8, "which could" suggested change "in which it is possible to"

pag. 8 § 1 line 3 "ecumenical" "community"????

Level of interest: An article of limited interest

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.
