Reviewer's report

Title: Prenatal diagnosis of fetal unilateral lung agenesis complicated with cardiac malposition

Version: 3 Date: 27 February 2013

Reviewer: Ornella Milanesi

Reviewer's report:

After the revision, the paper improved greatly. The English language is now correct and, thanks to the clearer explanation and to the support of the video-clip, the technique of imaging the fetal malformation is clear. I think this manuscript is now acceptable for publication on BMC Pregnancy and Childbirth, without further revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
