Reviewer's report

Title: Need for insulin to control gestational diabetes is reflected in the ambulatory arterial stiffness index

Version: 1 Date: 4 November 2012

Reviewer: GIANCARLO PARADISI

Reviewer's report:

The question posed by the authors is well defined, the methods are appropriate and well described, the results are interesting.
The discussion and conclusions are well balanced and adequately supported by the data. Limitations of the work are clearly stated.

This is an article of outstanding merit and interest in its field.
In my opinion, the manuscript would be accept without revision.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

The question posed by the authors is well defined, the methods are appropriate and well described, the results are interesting.
