Reviewer's report

Title: Maternal outcome of delivery among adolescent girls at the Yaounde Central Hospital

Version: 3 Date: 16 November 2013

Reviewer: Meng-Chih C Lee

Reviewer's report:

1. The article whose findings are important to those with closely related research interests in adolescent pregnancy and its outcomes.

2. Authors need to do a further statistical analysis on the predictors of poor pregnancy outcomes, e.g. preterm delivery, perineal tear or fetal death at birth, so that the article results will be of more importance.

3. Try to stratify your adolescent sample into early (10-14 years old), middle (15-17) and late adolescence (18-19) for statistical analysis

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
