Reviewer's report

Title: Ultrasound Study of Carotid and Cardiac Remodeling and Cardiac-arterial Coupling in Normal Pregnant and Preeclampsia Women

Version: 2 Date: 26 December 2013

Reviewer: Asma khalil

Reviewer's report:

The authors addressed my comments. There are some limitations in the methodology, e.g. the measurements were performed in supine position, which are not possible to correct for at this stage. I would suggest that the authors mention these limitations in the Discussion section.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
