Reviewer's report:

No Revisions:

This is a well researched, and well written report. The title is clear, and relevant. The data results and interpretation are cogent and well linked. The report's findings are important and add a dimension on the discussion around the participation of Traditional Birth Attendants in biomedical health systems, particularly from healthcare professionals' perspectives, which are under-represented in the global literature.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
