Reviewer’s report

Title: Medical issues in antenatal and perinatal periods among pregnant adolescents and young adults in Taiwan: a 10-year nationwide study

Version: 2 Date: 4 May 2014

Reviewer: Meng-Chih C Lee

Reviewer’s report:

1. A population-based administrative data study has a very good representation and generation.
2. Well literature review
3. Stressed on the medical issues with adolescent childbirth which has had limited information before.
4. Further English editing will be better
5. Please explore the information on IRB

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
