Reviewer's report

Title: Determinants of unintended pregnancies in rural Ghana

Version: 5 Date: 14 July 2014

Reviewer: Easmon Otupiri

Reviewer’s report:

Except for a few typographical/grammar errors that I am convinced the authors can deal with, I am satisfied with the current version of the manuscript.

Of interest would be whether if the authors subjected the analysis to all three levels (intended, mistimed and unwanted), the outcomes would have been different. There is a growing interest in separating mistimed from unwanted rather than keeping them together as unintended/unplanned.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare I have no competing interests.
