Reviewer's report

Title: Anti-diabetic Drug Utilization of Pregnant Diabetic Women in US Managed Care

Version: 2  Date: 20 September 2013

Reviewer: Dharmintra Pasupathy

Reviewer's report:

The authors have addressed many of the comments raised in the initial review. It is well written, be of interest to the readership and will provide the setting for future work which should correlate the changes in trends of prescription to outcomes in pregnancy against the background of increasing prevalence of diabetes in pregnancy. The future work will be complex and understandably will be part of a separate analysis / manuscript.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
