Reviewer's report

Title: Prevalence and determinants of unintended childbirth in Ethiopia

Version: 4 Date: 2 September 2014

Reviewer: Asheber Gaym

Reviewer's report:

The authors have accommodated some of the revisions I suggested and provided sufficient explanations for the ones which they thought they could not accommodate.

Based on my reading of the revised manuscript, I feel that the article is very useful and can proceed to the next phase of the publication process without the need for further revisions.
