Reviewer's report

Title: Increased risk of severe congenital heart defects in offspring exposed to selective serotonin-reuptake inhibitors in early pregnancy - an epidemiological study using validated EUROCAT data

Version: 4 Date: 17 July 2014

Reviewer: Edi Vaisbuch

Reviewer's report:

The authors adequately addressed all points raised in my initial review. I find the revised version of the manuscript suitable for publication in BMC Pregnancy and Childbirth current form.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
