Reviewer's report

**Title:** Increased risk of severe congenital heart defects in offspring exposed to selective serotonin-reuptake inhibitors in early pregnancy - an epidemiological study using validated EUROCAT data

**Version:** 4  
**Date:** 23 July 2014

**Reviewer:** Paula Vargas Innocenti

**Reviewer's report:**

I see an improvement on the title (helps to understand what the paper is about), and the reviewers comments where taking in consideration. I think is an excellent work1

I would like to know your opinion on the paper release last month on nejm about Antidepressant Use in Pregnancy and the Risk of Cardiac Defects, it comes to my attention the high prevalence of CDH in their group compare to yours been a similar total number of patients (they only used live births)

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
