Peer review of “Risk factors for reported obstetric complications and near misses in rural northwest Bangladesh: analysis from a prospective cohort study”

Overall comments
The authors have appropriately responded to all the queries raised by the reviewers. Where change was not effected a satisfactory explanation was presented. I have a few Discretionary Revisions otherwise published the manuscript.

Discretionary Revisions
1. Line: 135 Delete was in sentence beginning with “All women with pregnancy outcomes……”.
2. Line: 284 insert the between of and women.
3. Line: 341 Insert the between of and women.

Level of interest: An exceptional article

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
