Reviewer’s report

Title: Prenatal Risk Factors for Tourette Syndrome: A Systematic Review

Version: 2 Date: 4 December 2013

Reviewer: Carol Mathews

Reviewer’s report:

This paper is substantially improved, with only one minor essential revision still remaining (plus one or two typographical errors). The figure that documents the flow of the systematic review is missing the step that excludes the duplicated data. Otherwise, the authors have addressed all of the reviewers’ concerns.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
