Reviewer's report

Title: Pain relief in labour: A qualitative study to determine how to support women to make decisions about pain relief in labour

Version: 3 Date: 14 August 2013

Reviewer: Marlies Rijnders

Reviewer's report:

I think the article has improved substantially and I agree with the changes made by the authors.

However I suggest three minor revisions:
abstract line 55: women instead of women’s
Results line 216-222: this should be in the method section. It is not a result.
line 241: Leap instead of leap

I wish the authors succes with their work and look forward to read more of their reseach in future.

friendly greetings Marlies Rijnders

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
