Reviewer’s report

Title: Pregnancy-Induced Hypertension and Neonatal Growth at 28 and 42 days Postpartum

Version: 1 Date: 24 April 2005

Reviewer: Mark Walker

Reviewer’s report:

General

-------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

-------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
1. The authors should indicate which factor they controlled for in their regression.
2. Perhaps some analysis on the effect of preterm delivery on NGP. Especially those who were preterm and IUGR. May be multiplicative effect.
3. Table 3 could be reformatted as it is difficult to read.

-------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes
