Reviewer's report

**Title:** Determination of Interleukin-6 and Tumor Necrosis Factor-alpha concentrations in Iranian-Khorasanian patients with preeclampsia.

**Version:** 4  **Date:** 2 September 2005

**Reviewer:** A Hennessy

**Reviewer's report:**

I am happy that the grammar is improved and that the paper is suitable for publication.

I think the paper would benefit from provision of the Range of gestation ages in the two groups. The means are not shown on the graphs and this would be helpful and some comment about the normal or other distribution of the data?
