Reviewer's report

Title: Association between the plasma/whole blood lead ratio and history of spontaneous abortion: a nested cross-sectional study

Version: 2 Date: 20 August 2007

Reviewer: Ina Santos

Reviewer's report:

General
The answer of the authors and the current version of the manuscript clarify the methodological issues pointed out in the review. I consider the manuscript is now suitable for publication.

-------------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
