Reviewer's report

Title: Association between the plasma/whole blood lead ratio and history of spontaneous abortion: a nested cross-sectional study

Version: 2 Date: 27 July 2007

Reviewer: Victor H Borja-Aburto

Reviewer's report:

General
Authors have conducted additional analysis including an interaction term between bone lead and the tested ratio. This answers my previous concerns.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
