Reviewer’s report

Title: Assessment of social psychological determinants of satisfaction with childbirth in a cross-national perspective

Version: 2 Date: 24 July 2007

Reviewer: Paul Hewson

Reviewer’s report:

General

I think the points raised earlier have been addressed.

-----------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

I do suggest the authors review the use of ordinal regression models for these kinds of data.

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have no competing interests
