Reviewer's report

Title: Oral and dental health care practices in pregnant women in Australia: a postnatal survey

Version: 2 Date: 7 January 2008

Reviewer: Sisko Honkala

Reviewer's report:

Minor
In the Results section, 1st paragraph line 3 in the sentence "Just over half of the women enrolled in the study were over the age of 30 (219, 56%)."
It would be more clear to mark the number of the cases with "n=", i.e. (n=219, 56%)
This "n=" does not need to be repeated in the results later, only here when it comes first time.

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
