Reviewer’s report

Title: Use of real time continuous glucose monitoring and intravenous insulin in type 1 diabetic mothers to prevent respiratory distress and hypoglycaemia in infants

Version: 4 Date: 14 April 2008

Reviewer: Joachim Wolfram Dudenhhausen

Reviewer’s report:

I red the revised version of the manuscript, the 2nd reviewers statement and now I agree with the publication of the paper. It is not an evidence based paper, but it is an anecdotal case report and an interesting one.
