Reviewer's report

Title: Elevated Antiphospholipid Antibody Titers and Adverse Pregnancy Outcomes: Analysis of a Population-Based Hospital Dataset

Version: 1 Date: 14 November 2008

Reviewer: lothar heilmann

Reviewer's report:

I have a problem with the definition of preeclampsia and placental insufficiency. In any papers exist only an association to the degree of disease. The Grading of preeclampsia in moderate and severe forms are missed. The placental insufficiency is defined as Growth (Ultrasound) below 10. or 3. percentile. The definitions of APLS are described in the references (1) and different to the definitions in the paper.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
