Reviewer's report

Title: Postnatal quality of life in women after normal vaginal delivery and caesarean section

Version: 1 Date: 18 October 2008

Reviewer: Pamela D Hill

Reviewer's report:

In the concluding comments (Conclusion section) this reviewer strongly suggests that 'elective termination of pregnancy' is not appropriate as this research focused on vaginal vs. C/S in women who intended to deliver a term infant. It would seem that the authors have gone beyond the scope of the data with this concluding remark.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
