Reviewer's report

Title: Factors associated with tocolytic hospitalizations in Taiwan: evidence from a population-based and longitudinal study from 1997 to 2004

Version: 2 Date: 14 September 2009

Reviewer: Cecily M Begley

Reviewer's report:

The authors have responded to the reviewers’ comments and appear to have made all essential changes.

Minor Essential Revisions

1) The updated tables just need to have some differing font sizes amended, and consistency applied to commas in the figures (e.g. some are 18000 and some are 18,000).

2) On page 15, reference 36 is probably meant to be reference 38?

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
