Reviewer's report

**Title:** Acceptability of intrapartum HIV counselling and testing in Cameroon

**Version:** 2  **Date:** 19 September 2008

**Reviewer:** Marcel Manzi

**Reviewer's report:**

I very carefully read the corrected Acceptability of intrapartum HIV counselling and testing in Cameroon and I am satisfied with the corrections done by the authors.

I would like to tell that this article, on my side is acceptable and should be published. I hope before the publication, the editor or the authors should correct some typos, for instance, under the methods, 2nd paragraph where they say: "so the (there) was no extra cost of recruiting new staff"; or under the discussion, 1st paragraph where they write "..., discrimination and rejection which."
