Reviewer’s report

Title: Estrogen regulation of TRPM8 expression in breast cancer cells

Version: 2 Date: 20 March 2010

Reviewer: Greg Barritt

Reviewer’s report:

Minor Essential Revisions

1. Methods, pages 7 and 8, immunoprecipitation detection TRPM8, and Results Page 10, paragraph 1 last 2 lines. I think it should be made clear what the immunoprecipitation experiments involved. It seems the same antibody was used for both the ip and the detection on Western blot. It is sometimes better to use different antibodies. The authors should just indicate that ip and detection were with the abcam antibody if this is the case.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
