Reviewer's report

Title: Residual hepatocellular carcinoma after oxaliplatin treatment has increased metastatic potential in a nude mouse model and is attenuated by Songyou Yin

Version: 3 Date: 6 April 2010

Reviewer: JASON CHIA-HSIEN Chia-Hsien CHENG

Reviewer's report:

The authors failed to respond to the reviewer's comments (no. 2, 3, 4, and 5) and did not add the corresponding data to improve the scientific merit of this study. It is not good enough to just say "in the future studies". The current version is not acceptable until the authors supplement the data according to the reviewer's comments.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
