Reviewer's report

Title: TTFields alone and in combination with chemotherapeutic agents effectively reduce the viability of MDR cell sub-lines that over-express ABC transporters

Version: 2 Date: 10 April 2010

Reviewer: Liwu Fu

Reviewer's report:

The authors did not improve the manuscript and did not respond to the question 1,4,5.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.
