Reviewer’s report

**Title:** Increased expression of MMP9 is involved in poor prognosis in nasopharyngeal carcinoma

**Version:** 2  **Date:** 1 April 2010

**Reviewer:** hela ben nasr

**Reviewer’s report:**

**Major compulsory revisions:**
The discussion section needs to be improved considerably. The authors just relate data from the literature. There is no real reflexion on their findings according to previous studies. Some errors (typing, spelling..) still exist in the revised version.

**Level of interest:** An article of limited interest

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** Yes, and I have assessed the statistics in my report.
