Reviewer's report

**Title:** Incidence of chemotherapy-induced amenorrhea associated with epirubicin, docetaxel, and navellbine in younger breast cancer patients

**Version:** 1  **Date:** 21 March 2010

**Reviewer:** Fabio Puglisi

**Reviewer's report:**

In the present study, the authors evaluated the impact of docetaxel and navelbipe in anthracycline-based chemotherapy regimens on the incidence of amenorrhea for premenopausal patients with breast cancer. The impact of therapy with tamoxifen following chemotherapy on the incidence of chemotherapy induced amenorrhea was also assessed.

Minor Essential Revisions

The authors should add the following recent paper in their list of references and comment about it in the discussion:

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
