Reviewer's report

Title: Incidence of chemotherapy-induced amenorrhea associated with epirubicin, docetaxel and navelbine in younger breast cancer patients

Version: 3 Date: 27 April 2010

Reviewer: Mikkel Rosendahl

Reviewer's report:

In their revised manuscript, the authors have presented a clear and interesting paper to which I only have a few comments.

Minor Essential Revisions:
Abstract, conclusion; "... whereas doco and navel were not associated with higher rates of CIA" Higher than what?

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
