Reviewer's report

Title: Myc suppression of Nfkb2 accelerates lymphomagenesis

Version: 2 Date: 10 June 2010

Reviewer: Benjamin Barré

Reviewer's report:

Comments for the authors

The authors of this study have responded to almost all the questions of the reviewers (except the question 4 from the first reviewer). Altogether, this study deserves to be published in BMC cancer and I am looking forward to see a future paper on the explanation of nfkb2 transcriptional control by myc and its partners.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
