Reviewer's report

Title: Determinants of participation in colonoscopic screening by siblings of colorectal cancer patients in France

Version: 1 Date: 14 February 2010

Reviewer: Tim Greten

Reviewer's report:

This is an interesting article. However the authors should at least discuss the following points:
- the population of siblings is rather small
- is there any possibility to verify the correctness of the answers given by the siblings
- most importantly the authors should discuss in more detail what could be done to improve the acceptance of colonoscopies for prevention

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
